

# KODA CREATIVE THEMED ENVIRONMENTS

Hi! We are a rockwork and theming company from the UK.

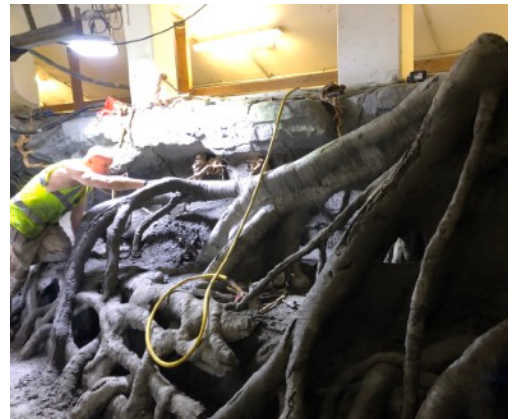

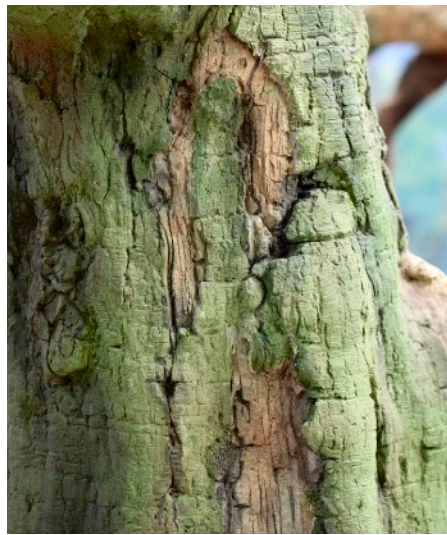

Specialising in the construction of hyper realistic animal environments, our skills have been appreciated all over the world. We have worked on many big name projects in diverse places ranging from the Arctic Circle to the desert nations of the Middle East and beyond.

We build trees, huge and small rock formations, ancient ruins, caves, waterfalls, aquarium environments and anything in between. Using predominantly steel and sprayed concrete, our product is not only beautiful but also very strong and long lasting.

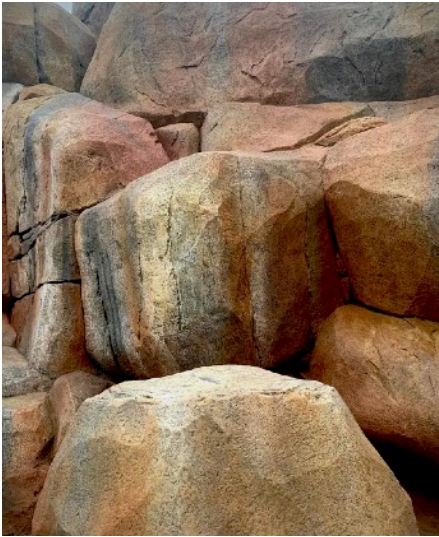

## Find out what we can do for you.

We offer free quotations, advice, support and a completely in house design service. Planning made perfect!

We can do museum quality exhibits if the resources allows but also offer low cost solutions for many situations. Whatever your budget though, we aim to over deliver, every time.

We want to build your dream environment!
